Innovation Award

Michael Carruth

Engineering & Product Leader | Platform Builder, Org Fixer, and Scale Operator | Ex-Amazon & Microsoft | Distributed Systems, IoT, Ads, Retail Tech

Garden City, Idaho, United States

Summary

Engineering leader with 20+ years at Amazon and Microsoft. I step into ambiguous, high-risk situations—broken platforms, fragmented teams, flawed assumptions—and leave systems meaningfully better. I focus on building durable platforms, turning operational chaos into measurable systems, and developing technical leaders. Still writing code and learning new stacks.

Experience

Amazon

7 years 11 months

Senior Software Development Manager, Amazon Devices

May 2020 - February 2022 (1 year 10 months)
Seattle, Washington, United States

• Reframed the business case for a new hardware product, safeguarding an $8M investment.
• Scaled the messaging stack to support over 100M concurrent connections, achieving a 50% reduction in latency.
• Led a successful recovery of a failed beta launch, improving product ratings from 2 to 4.5 stars.

Senior Software Development Manager, Sponsored Brands

February 2019 - May 2020 (1 year 4 months)
Greater Seattle Area

• Scaled Sponsored Brands and Video Ads platforms supporting multi-billion-dollar revenue
• Launched Advertiser Strategies, unlocking 25%+ YoY growth in advertiser spend

Senior Software Development Manager, Device Retail Tech

April 2014 - February 2019 (4 years 11 months)
Seattle, WA

• Led Amazon's first scalable offline retail platform, facilitating sales across 15 countries and 500+ retailers.
• Launched 100+ physical retail kiosks and in-store programs with Kohl's, Whole Foods, and other major partners.
• Automated S&OP planning processes, achieving a 75% reduction in costs and halving out-of-stock rates.

Microsoft
10 years

Principal Software Development Lead, Bing Ads
September 2008 - April 2014 (5 years 8 months)
Redmond, WA

• Designed self-service Google Ads import workflow that accelerated advertiser growth and revenue.
• Scaled Microsoft Advertising Editor from beta to general availability, achieving a 200x increase in usage.

Senior Software Development Lead, Windows
May 2004 - September 2008 (4 years 5 months)
Redmond, WA

Managed an engineering team responsible for Microsoft Application Compatibility Toolkit components and enterprise tooling.

Sage Software
Senior Software Engineer, Peachtree Accounting
September 2003 - May 2004 (9 months)
Atlanta, GA

Senior C++ developer, responsible for the design, development, and unit-testing of several new Peachtree Accounting features.

Automatic Data Processing
Senior Software Engineer, NAS
May 1998 - May 2003 (5 years 1 month)
Atlanta, GA

Senior C++ developer, responsible for multiple major releases of ADP’s eHRMS Builder product, a suite of tools for customizing HR workflows in the ADP eHRMS system. Responsible for all aspects of product’s development from approving all feature designs, working with business on the direction of the product, and continuing to function as the primary developer on a team of five.

Education

Auburn University

Bachelor of Science, Computer Science · (1995 - 1998)
